S.O.O.

DETAILED ACTION

1. Claims 56-90 are pending.

This is a new action relevant to above pending claims from the previous action mailed on 2/7/05.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 56 and 74-90 drawn to an antibody to SEQ ID NO:1, classified in class 530, subclasses 350, 388.1 and 389.1
- II. Claim 57 drawn to an antibody to SEQ ID NO:2, classified in class 530, subclass 350.
- III. Claims 58-74 drawn to an antibody to rapamycin effector protein classified in class 530, subclass 387.3.

3. The inventions are distinct, each from the other because of the following reasons:

Groups I-III are different products. The antigens of Groups I-III are distinct because their structures and properties are different. It appears that SEQ ID NOS:1-2 vary in their size, composition, possess different structures and distinct nucleotide sequences, which encode distinct proteins or peptides.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. This application contains claims directed to the following patentably distinct species of the claimed invention of Group III. The distinct species are the molecular weights of rapamycin effector proteins and the identity of plasmids (see claims 65-69). Applicant is required to elect a particular molecular weight and one plasmid which encodes the rapamycin effector protein.

These species are patentably distinct based on their distinct structures and characteristics.

Art Unit: 1644

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 58 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yunsoo Kim whose telephone number is 571-272-3176. The examiner can normally be reached on M-F, 9-5.
